Mattress Care

Do's

- * Do give your new mattress time to "air" upon removal from its plastic packaging. Dispose of all plastic packaging as soon as possible. New mattresses may have a "new bed smell" that may take a couple of weeks to dissipate.
- * Do carry your mattress flat on its side. It's easier to handle and you'll be less likely to damage the mattress
- * Do vacuum your mattress periodically. It prevents dust from setting in. Do keep your bedding clean. We suggest using a mattress pad. A quality, washable mattress pad will help keep the mattress free from stains. If you're determined to tackle a stain, use mild soap with cold water and rub lightly. Don't ever soak a mattress or foundation.
- * Buying a mattress protector is a good idea, it would prevent liquid from entering the mattress, and is ideal for parents who have children with bed wetting issues.
- * Do rotate your mattress occasionally from head to toe, to prolong the comfort and support life. Body indentations are a normal occurrence in your new mattress and indicate that the upholstery layers are conforming to your body's individual contours. Only body-indentations greater than 2 inches mean sagging.
- * Do retain the original bill as well as the guarantee card, to enable quick processing of warranty claims.

Dont's

- * Do not use dry cleaning fluid of any type on your mattress. These chemicals will damage some of the construction materials.
 - * Do not allow your mattress to get wet. Some of the upholstery materials may compress. Protect it from water or other liquids. In the event that your mattress become wet, absorb the latex used in the rubberized coir and hence drying outdoors is to be strictly avoided.
 - * Do not let anyone stand or jump on your mattress. It was not built for that type of weight distribution or abuse.
 - * Do not bent your new mattress more than 20 degrees. Such treatment may damage the inner spring unit. Flex rather than bent the mattress when going through doorways.
-

Sleep Needs Over The Life Cycle

Sleep is a basic necessity of life, as important to our health and well-being as air, food and water. Getting enough continuous Royal sleep contributes to how we feel and perform the next day, but also has a huge impact on the overall quality of our lives. Getting enough sleep refers to the amount of sleep you need to not feel sleepy the next day.

Infant / Babies (including naps)	
0 - 2 Months	10.5 - 18.5 hours
2 - 12 Months	14 - 15 hours
Toddlers / Children (including naps)	
12 - 18 Months	13 - 15 hours
18 Months - 3 years	12 - 14 hours
3 - 5 years	11 - 13 hours
5 - 12 years	9 - 11 hours
Adolescents	8.5 - 9.5 hours
Adults / Older Person	On average 7 - 9 hours

The chart shows that we are spending one third of life for sleep so its is very important to spend a little time to choosing a good mattress. Shop with your partner and lie down on mattress and assess how well it provides support and comfort. Take your time and get a FIBRO DREAMZ mattress that suits both of you.
